

Mohamed Magdy Shawky

Computer Science and AI Student

Contact Information:

- Name: Mohamed Magdy Shawky Abdelhamid
- Phone: +201006201448
- Email: mohamed1942004m@gmail.com
- Location: Shebin El Kom city, Menoufia, Egypt

Summary

Highly motivated and results-oriented Computer Science and AI student with a proven track record in software development. Possessing 1 year of dedicated experience in **Node.js backend development**, specializing in building scalable and efficient APIs, alongside 1 year of expertise in **Flutter mobile development**, creating intuitive and high-performance cross-platform applications. Adept at problem-solving, with a strong foundation in diverse programming languages and a passion for leveraging technology to create innovative solutions. Seeking to apply comprehensive technical skills and collaborative spirit to contribute to challenging development projects.

Education

Bachelor's Degree in Computer Science and AI | Assiut National University, Assiut, Egypt

- 2022 – Present

High School Diploma | Hussein Ezzat School, Menoufia, Egypt

- 2019 – 2022

Languages

- Arabic (Native)
- English (Proficient)
- French (Intermediate)

Training & Certifications

- **AI using Python powered by IMPACT:** Focused on practical applications of artificial intelligence using Python.
- **Full-Stack Course:** Comprehensive training covering front-end and backend development technologies.

- **ManarahTech Network Course:** Gained foundational knowledge in network protocols and IT infrastructure.
- **English Course:** Enhanced communication and technical writing skills.

Professional Experience

FRONT-END DEVELOPER (REACT)

- **End Date Developed and maintained dynamic and responsive user interfaces using React.js, ensuring optimal user experience across various devices.**
- **Integrated RESTful APIs to fetch and display data, ensuring efficient and real-time data flow within applications.**
- **Collaborated closely with UI/UX designers and backend developers to translate design mockups and wireframes into high-quality code.**
- **Implemented state management solutions (e.g., Context API, Redux) to manage complex application states effectively.**

BACKEND DEVELOPER (NODE.JS)

- Implemented and optimized RESTful APIs, facilitating seamless communication between client-side applications and databases.
- Collaborated effectively with front-end development teams to integrate server-side logic, ensuring cohesive application functionality.
- Contributed to architectural discussions and code reviews, maintaining high code quality and adherence to best practices.

MOBILE DEVELOPER (FLUTTER)

- Developed and launched high-performance, cross-platform mobile applications for iOS and Android using Flutter framework.
- Translated UI/UX designs into pixel-perfect user interfaces, ensuring an engaging and intuitive user experience.
- Integrated third-party APIs and services, enhancing application functionality and user engagement.
- Participated in the full software development lifecycle, from requirements gathering to deployment and maintenance.

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Dart, Python, C/C++, C#, Java, Kotlin
- **Backend Development:** Node.js, Express.js, RESTful APIs, Database Integration (SQL/NoSQL concepts)
- **Mobile Development:** Flutter, Android (Kotlin), UI/UX Design Principles
- **Web Technologies:** HTML5, CSS3, React.js
- **Tools & Platforms:** Git, GitHub, Selenium, Pytest, VS Code, Postman

- **AI/ML:** AI Model Development, Natural Language Processing (NLP) concepts, Machine Learning Algorithms
- **Software Development:** MVC Architecture, Object-Oriented Programming (OOP), Data Structures, Algorithms, Command Line Interface (CLI) Development

Academic Projects

- **MVC Cored Medical Appointment System:** Developed a comprehensive medical appointment system, demonstrating proficiency in MVC architecture, database design, and secure data handling.
- **AI Model for Sound Command Processing:** Engineered an AI model capable of interpreting and executing sound commands on a main operating system, showcasing advanced skills in AI/ML, speech recognition, and system integration.
- **Command Line Interface (CLI) Project:** Created a foundational CLI application, applying core operating system principles and demonstrating a strong understanding of system-level programming.
- **Mobile Clock App (Kotlin):** Designed and implemented a native Android clock application using Kotlin, focusing on efficient resource management and user-friendly interface design.
- **Mobile Store (Flutter):** Built a feature-rich mobile e-commerce application with Flutter, incorporating product catalogs, shopping cart management, secure payment gateways, and user authentication.
- **Hotel Management System Testing Website:** Developed an automated testing website for hotel management systems using Selenium and Pytest, ensuring robust functionality and identifying potential issues through comprehensive test cases.
